Data Storytelling Overview

Stories in Tableau allow creating a sequence of dashboards, visualizations, and annotations to present data insights in a cohesive, narrative-driven flow.

Story Points Summary

Sequential narrative breakdown across key analytical dimensions.

Story Point	Title	Core Observations
Point 1	Market Snapshot	1.55B total EV sales at an average price of $64,921, with India, China, and Vietnam leading production output.
Point 2	Range and Value	Luxury Sedans and SUVs offer the longest range, and Electric Buses retain the most value after 3 years ($14.5M).
Point 3	Sales Trend	Annual sales are stable from 2018 to 2026, led by Two-Wheeler Scooters, while Electric Trucks sell the least.
Point 4	Battery Technology	NMC and LFP batteries lead in sales units, while Solid-State and LFP show the longest cycle life.
Point 5	Charging and Impact	High-capacity vehicles charge fastest (about 350 kW) but use more energy per km, and 738K tons of CO2 are saved per year across regions.
